Our expertise in Technology with vast experience over the years helps client get Solutions with optimized cost and reduced risks.

Job Description:

We are seeking a skilled **BigQuery Developer** with 4–5 years of experience to design, develop, and optimize scalable data solutions on **Google BigQuery**. The role involves close collaboration with analytics and business teams to deliver high-quality dashboards, reports, and data models that support data-driven decision-making.

Key Responsibilities:

- Design, develop, and optimize data solutions using **Google BigQuery**
- Build and maintain dashboards and reports using **Looker / Looker Pro**
- Work with large datasets and ensure efficient query performance
- Collaborate with analytics and business stakeholders to translate requirements into data solutions
- Support data modeling and analytical use cases (preferred)

Key Requirements:

- Strong hands-on experience with **Google BigQuery**
- Proficiency in **Looker / Looker Pro** for dashboarding and reporting
- Experience working with large-scale datasets
- Strong SQL and query optimization skills
- Knowledge of data modeling and analytics is a plus
