Job Description:

We are looking for an Oracle GoldenGate Administrator experienced in CDC, replication monitoring, administration, and troubleshooting, including the Oracle GoldenGate Big Data Adapter.

Key Responsibilities:

- Install, configure, and administer Oracle GoldenGate.
- Manage Extract, Data Pump, and Replicat processes.
- Monitor CDC replication, lag, and data synchronization.
- Troubleshoot replication failures and performance issues.
- Administer Oracle GoldenGate Big Data Adapter integrations with Kafka and other big data platforms.
- Perform upgrades, patching, maintenance, and health checks.
- Manage security, access permissions, and operational support.

Required Skills:

- Hands-on experience in Oracle GoldenGate administration.
- Strong knowledge of CDC and real-time data replication.
- Experience with Oracle GoldenGate Big Data Adapter.
- Knowledge of Oracle Database, SQL, and Linux/Unix.
- Experience in monitoring, troubleshooting, performance tuning, and production support.

Education: Bachelor's degree in Computer Science, Information Technology, Engineering
