

Job Title : GCP Engineer
Experience: 5+ Years
Location: Airoli, Mumbai
Notice Period: Immediate Preferred
Company Name: PibyThree Consulting Services Pvt Ltd
Website: www.pibythree.com

About Us:

πby3 is a cloud transformation company helping enterprises build future-ready solutions with deep technology expertise, optimized cost, reduced risk, and strong delivery ownership.

Job Summary:

Seeking a GCP Engineer with expertise in Google Cloud Platform, Terraform, and GKE. Must have hands-on experience with GCP Landing Zones, cloud automation, governance, security, troubleshooting, cost optimization, and managing scalable cloud infrastructure.

Key Responsibilities

- Design, deploy, and manage cloud infrastructure on **Google Cloud Platform (GCP)**.
- Develop and maintain **Infrastructure as Code (IaC)** using **Terraform**, including reusable modules.
- Manage and support **GKE, Compute Engine, IAM, Cloud Storage, Cloud SQL, Logging, and Monitoring** services.
- Implement and support **GCP Landing Zones**, cloud governance, and security best practices.
- Troubleshoot complex issues related to **GKE, IAM, VPC-SC, Cloud SQL, and networking**.
- Automate cloud operations using **Cloud Functions** and other GCP-native services.
- Monitor cloud resources and drive **cost optimization** initiatives.
- Collaborate with cross-functional teams and support **multi-cloud environments (GCP/AWS/Azure)**.
-

Required Skills (Mandatory)

- **5+ years of IT experience** with **3+ years of hands-on GCP experience**.
- Strong expertise in **GCE, GKE, IAM, Cloud Storage, Cloud SQL, Logging & Monitoring, and VPC-SC**.
- Hands-on experience with **Terraform**, including module creation and maintenance.
- Experience in **GCP Landing Zone implementation (Mandatory)**.

- Strong knowledge of **Kubernetes, Microservices Architecture, and Cloud Governance/Security**.
- Experience in **Cloud Functions automation**, troubleshooting, and cloud cost optimization.
