

PibyThree – Information Security Policy

PibyThree is committed to protecting the **confidentiality, integrity and availability** of our information and client data. Our Information Security Management System (ISMS) is designed in accordance with **ISO/IEC 27001:2022** and supports our business goals and customer trust.

We commit to:

- Operate and continually improve an ISMS aligned with international best practices.
- Comply with all applicable legal, regulatory and contractual obligations.
- Identify, assess and treat risks using a structured, risk-based approach.
- Train and raise awareness so that all employees and contractors understand and follow information security responsibilities.
- Respond quickly and effectively to information security incidents, applying lessons learned.
- Ensure the ISMS provides a framework for setting and reviewing information security objectives.

Applicability

This policy applies to all PibyThree employees, contractors, suppliers and third parties who handle or access PibyThree information or systems.
